

NAAVA

Experience the power
of nature. Indoors.

NAAVA

Product Catalog

Combining the beauty and intelligence of **nature** with modern **technology** and Scandinavian **design**, Naava invites you to breathe fresh forest air where you most spend your time – indoors.

Rethink the indoors

We believe that the future of modern urban environments is in spaces that make their users happier, healthier, and more inspired in their daily lives.

We at Naava create **human-friendly** interiors designed to foster our biological needs with innovative, **nature-driven** solutions.

Fresh air. Naturally.

Naava's biofilters are **100 times** more effective than regular plants, removing **~57%** of harmful chemicals from the air consistently and without a decline. In addition to removing pollutants, Naava adds **2x healthy microbes** to the air, improving our immune system.

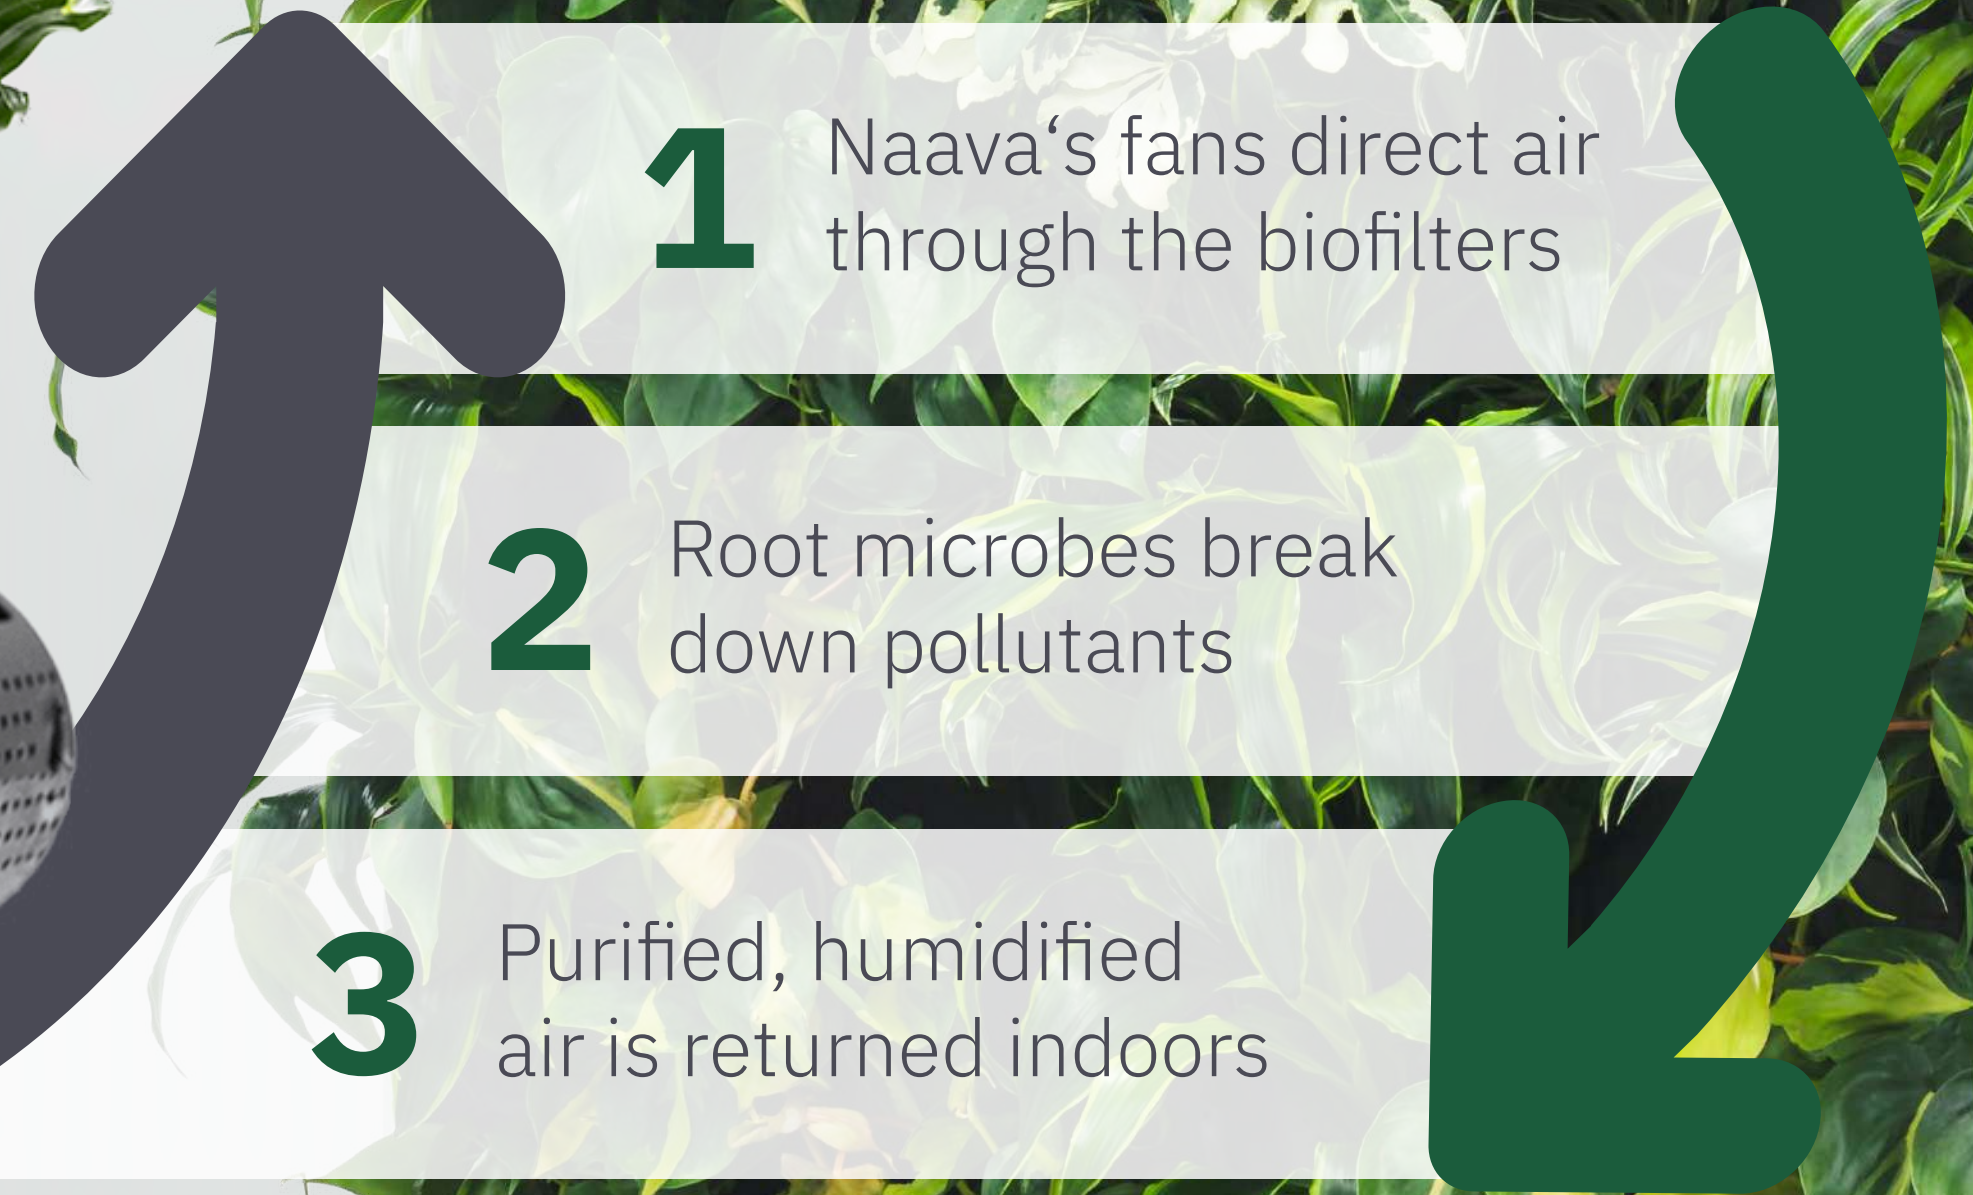

Torpy et al. 2017; Mikkonen et al. 2018; Soininen et al. 2020

1 Naava's fans direct air through the biofilters

2 Root microbes break down pollutants

3 Purified, humidified air is returned indoors

Automated and intelligent

Don't take care of your plants – let them take care of you.

Together with Naava's **automation** and **24/7 remote connection**, our **Service team** guarantees that your plants look fresh at all times.

Monitor and control your indoor environment with the **Naava app**.

Naava One can be placed against a wall for a more traditional green wall by combining several modules side-by-side, or a free-standing room divider for a more functional, furniture-like solution.

Naava One

The world's most sold green wall has beauty and performance

No matter if you are looking for a stunning eyecatcher, a versatile space divider, or the most effective way to improve air quality, Naava One caters to your needs.

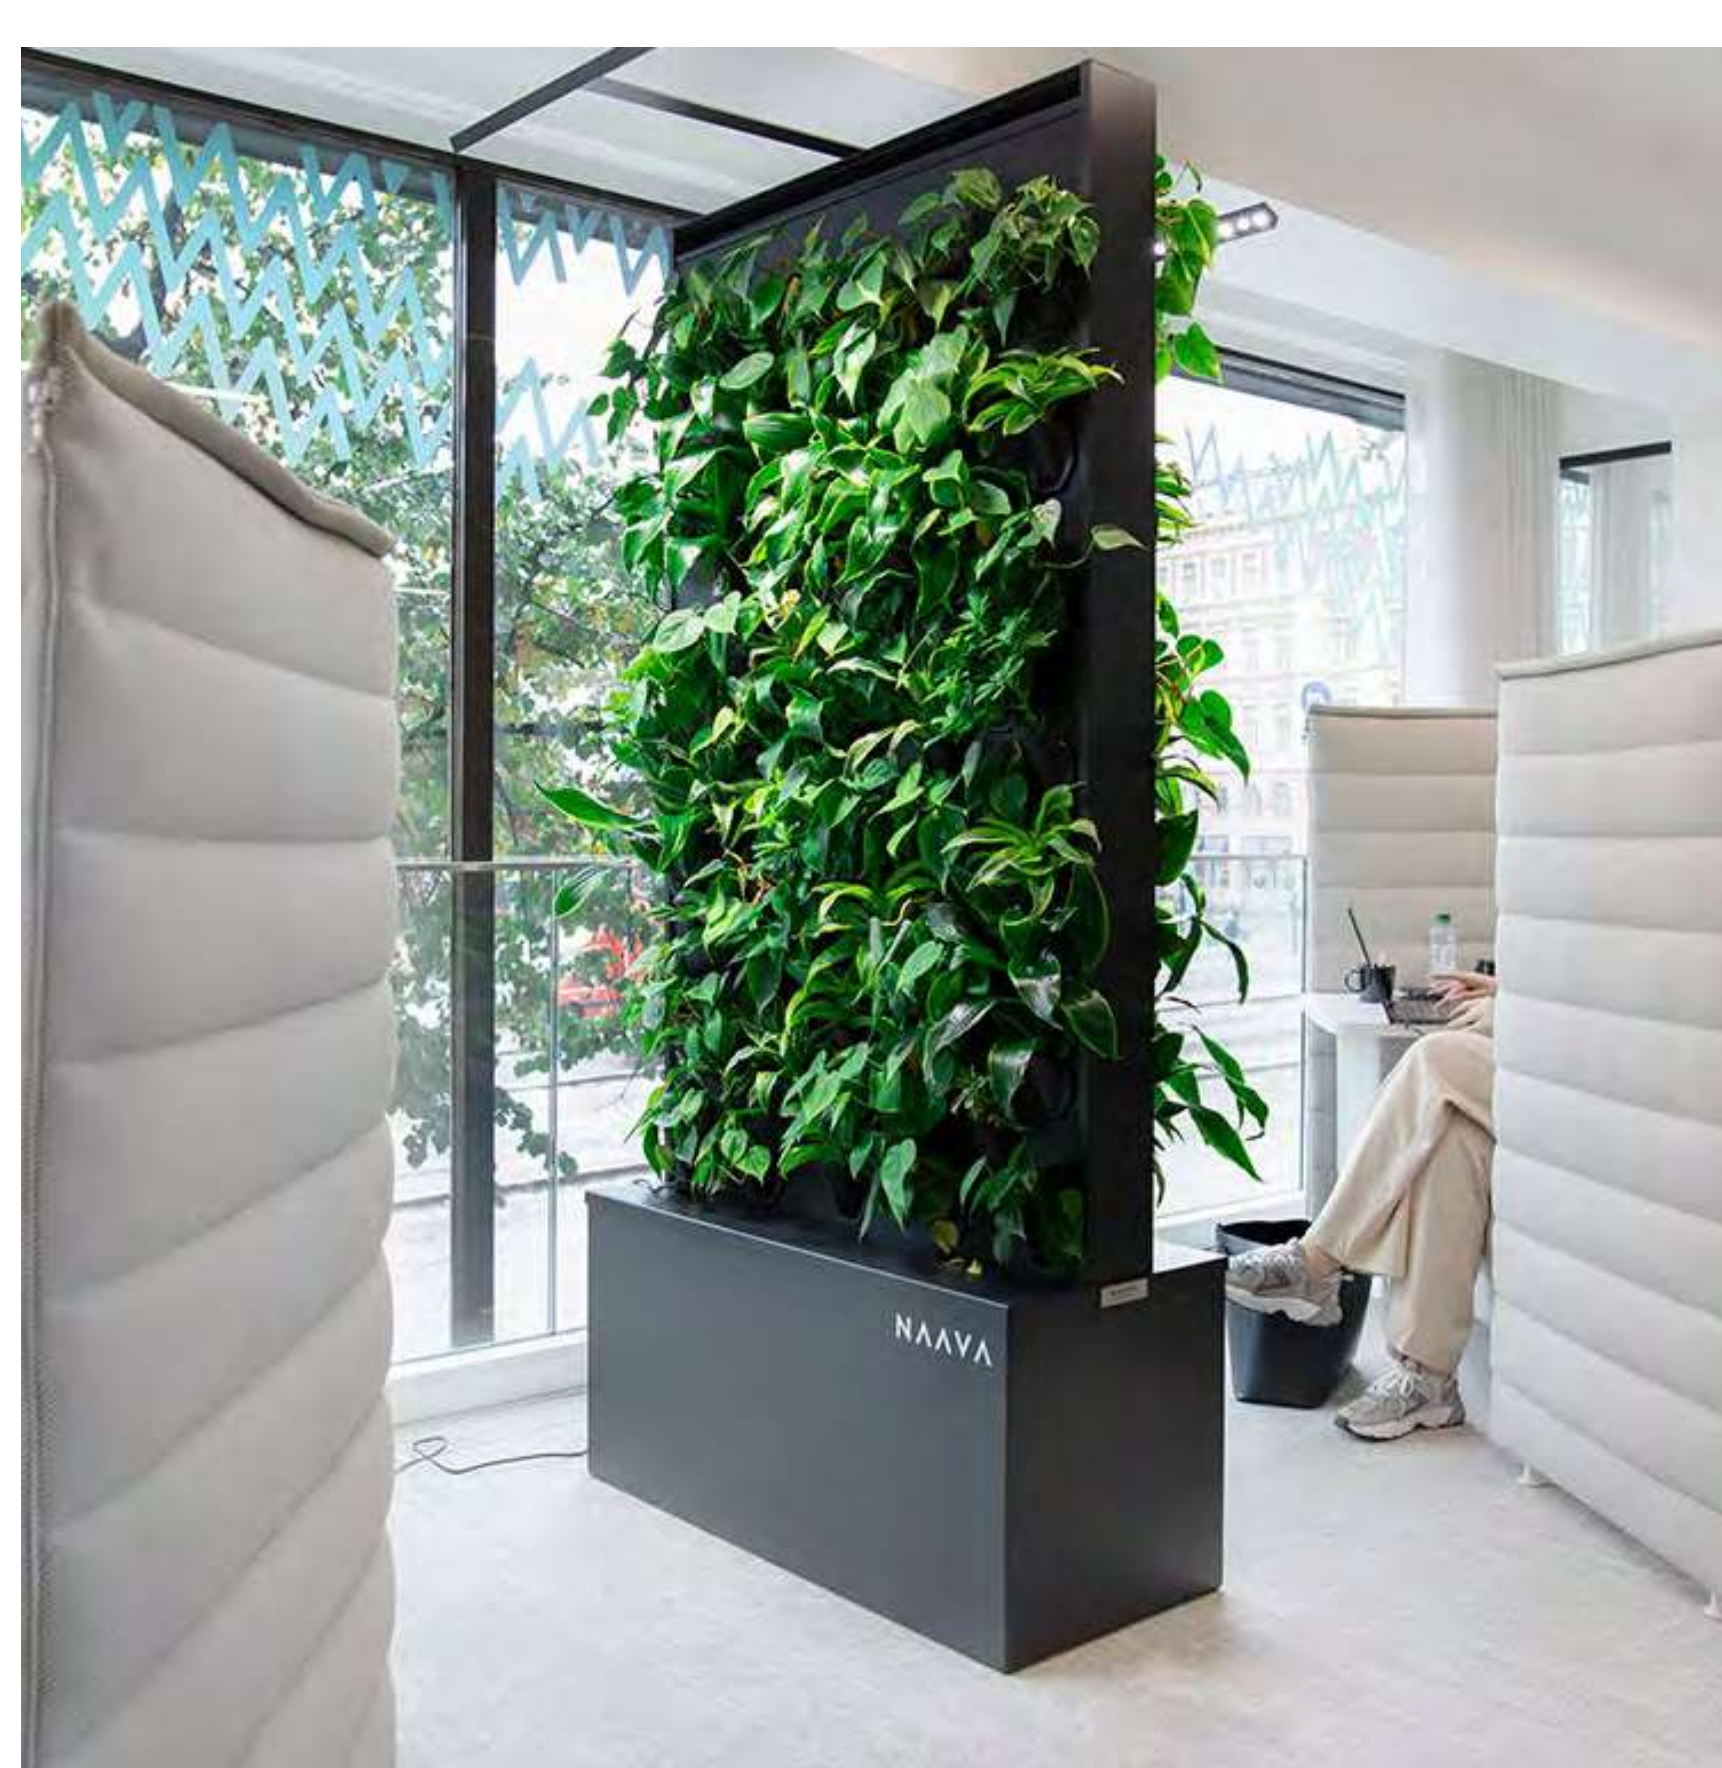

Naava One Slim can be used side-by-side to create big plant installations either by placing them against the wall, or by integrating them into the wall structures.

Naava One Slim

Integrate broad plant surfaces seamlessly into the decor

Lean design showcases the beautiful, lush plant surface at its best, perfect for creating big, eye-catching pieces that bring life to any space.

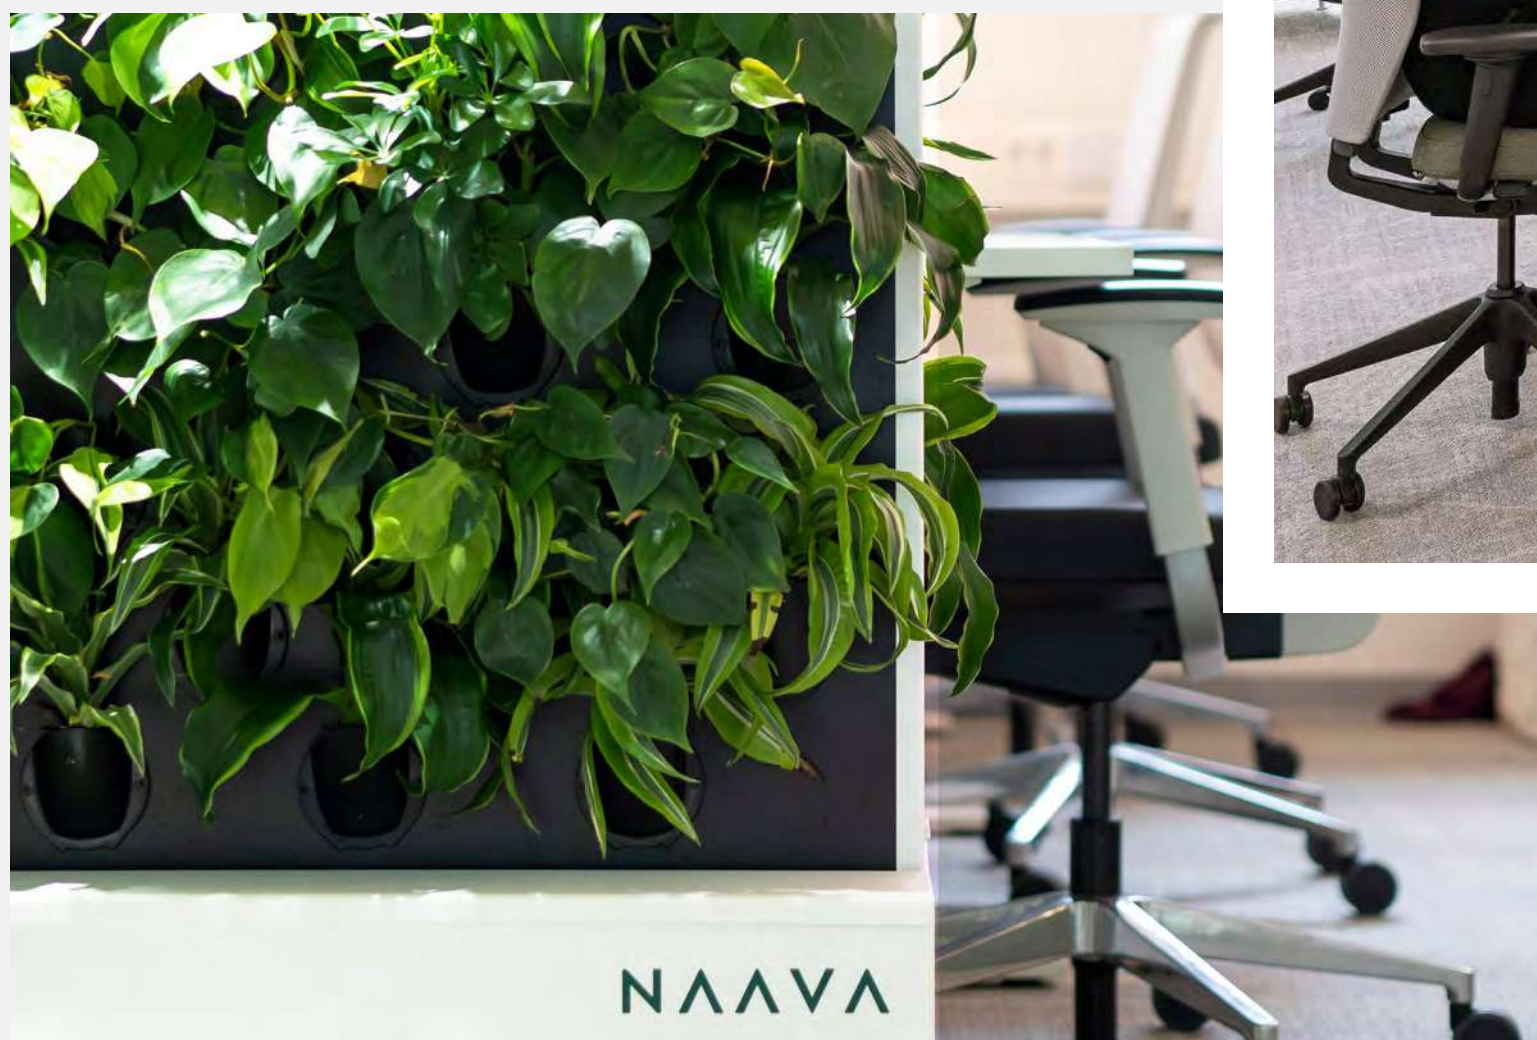

Naava Duo can be used as a free-standing room divider to create privacy and separate areas in open spaces. With Naava skate, the divider's location within the space can be changed any time.

Naava Duo

Rich green nature on both sides of a living room divider

Bring the benefits of nature to your space – in double. The abundant plant surface also acts as a noise-absorbing element, improving acoustics.

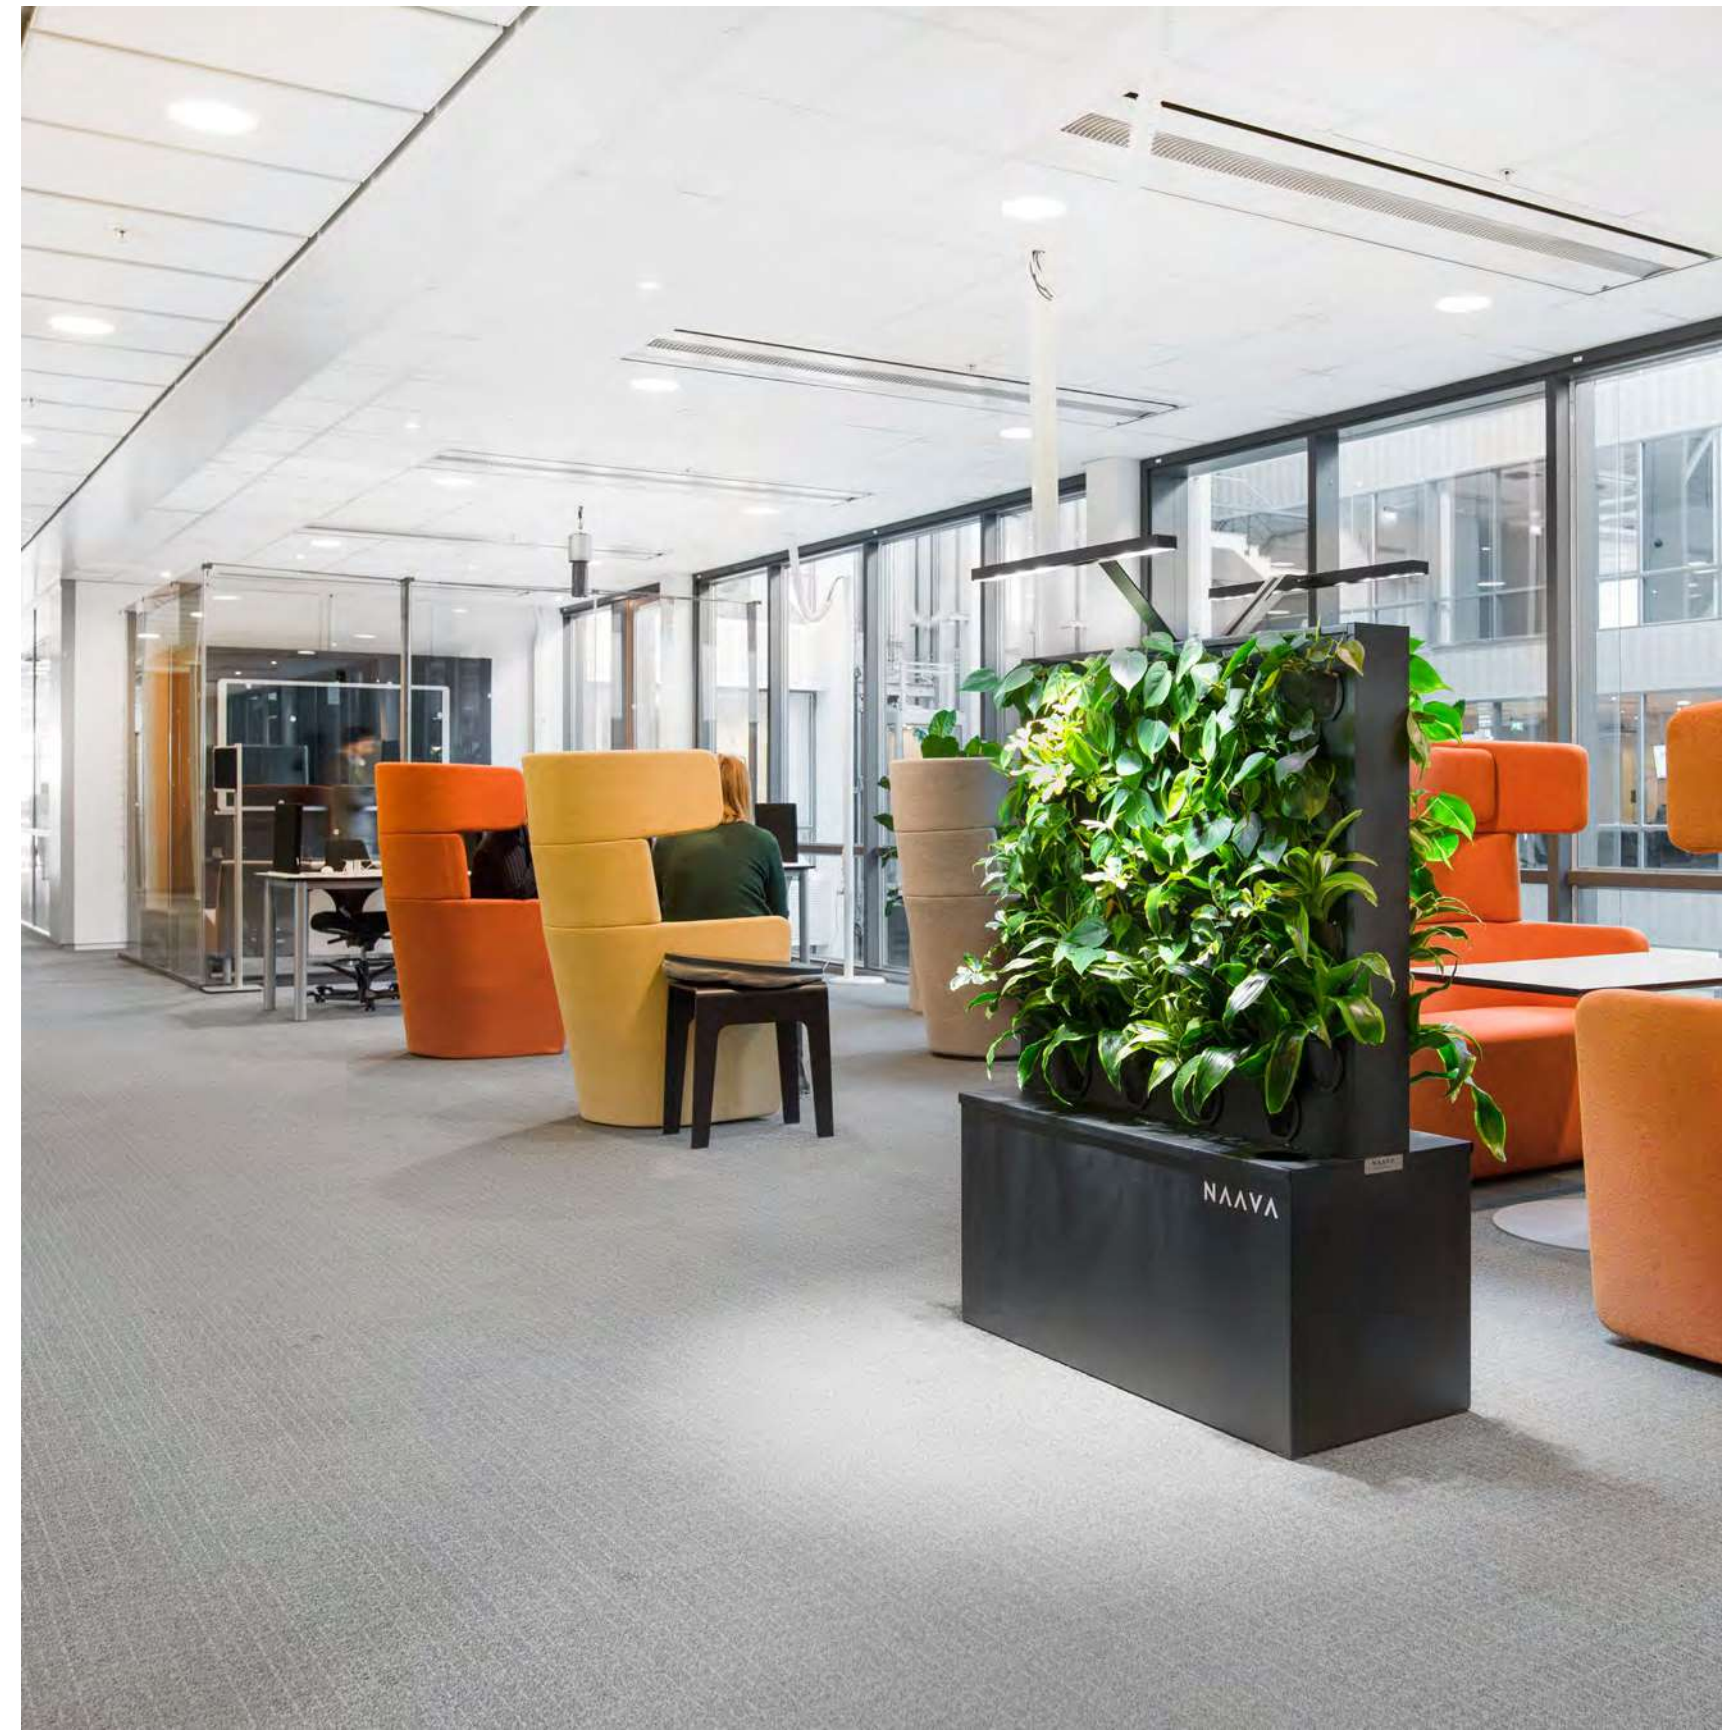

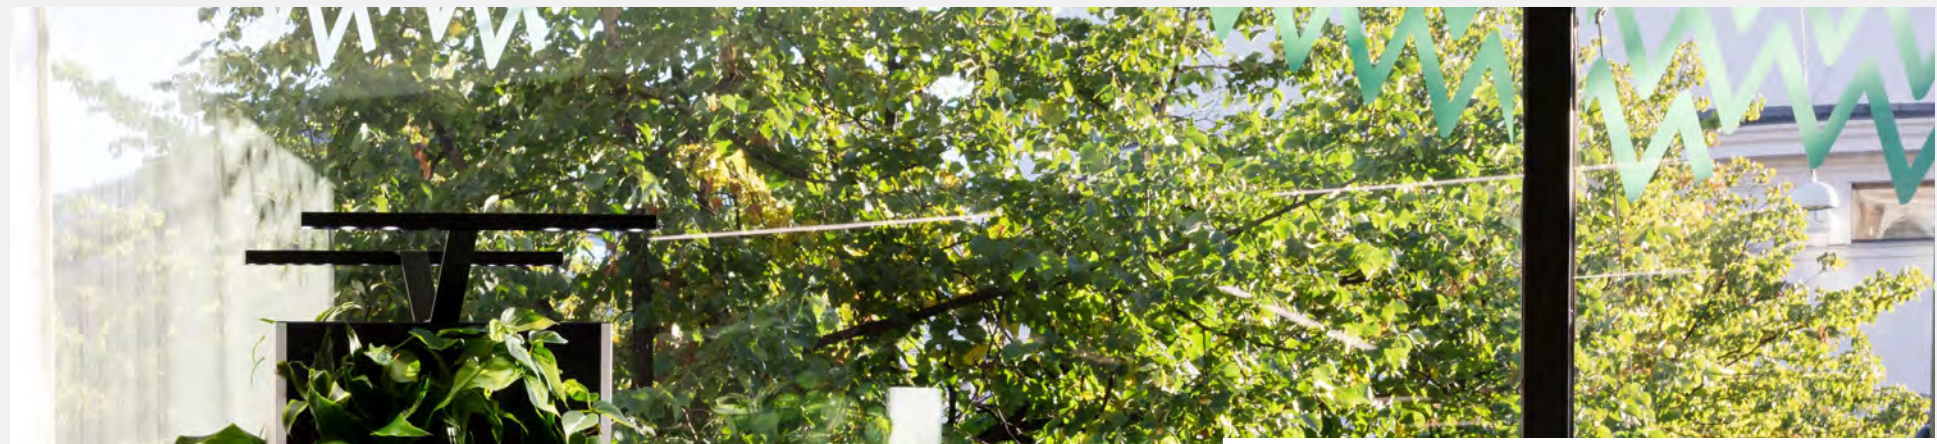

Naava Flow can be used next to a wall or as a free-standing room divider to create privacy while seated, but keeping the view of the space open. This furniture is easy to place even inside a phone booth.

Naava Flow

The cutest air purifier in the world fits into any space

Naava Flow delivers the green lushness of the plants and the effect of fresh air indoors as effectively as the taller models.

Naava Flow Duo can be used as a free-standing room divider to create privacy while seated. Perfect for separating working stations from each other or other areas within the space.

Naava Flow Duo

Double-sided room divider provides privacy while leaving the view open

Naava Flow Duo brings nature indoors in a compact package. This furniture adds a biophilic element to open spaces, and is a good addition to bring varying heights into the interior design.

Add-ons

Utilize both sides of the green wall with a magnetic **whiteboard** or **back panel** available for all free-standing Naava models.

Give your logo a stunning green and well-lit background with the **logo** add-on available for all Naava models.

Naava **skate** makes all free-standing units easy to move and turn around at any time, allowing you to change the purpose and functionality of your space in a blink of an eye.

Available in Finland and Sweden

Naava Oasis comes in two sizes, as well as customizable dividers that have been designed to fit with the green walls. Talk to our designers and sales to find the solution for your space.

Naava Oasis

Elevate the effect of fresh air with wooden, space dividing elements

Perfect for open spaces, Naava Oasis provides a dedicated area for concentration or relaxation. Like forest foliage, it cushions the movements of sound, light and air around it.

Technical details

Electricity

Naava needs an electric outlet with constant power. One-sided models consume on average 17 kWh/month, double-sided 30 kWh/month. Naava's electrical cord comes either from the top corner of the green wall, from its back wall, or for double sided models, from one of the front walls. The outlet should not be located behind the green wall, but should always be easily accessible.

Placement

Naava should be placed in a space with a temperature of at least +16°C. The optimal location is near an inlet. There should always be 100 mm of space above and 500 mm in front of Naava for maintenance. If Naava is embedded in the wall, both sides should have 15 mm of space and the top should have 100 mm of space above it.

Light

The integrated 2000 lux LED light in the color natural white (5700K) beautifully lightens up the Naava while also vitalizing the plants – and you. No other source of light is needed for the plants to thrive.

N-light

Naava N-series models tell their status with a led-light: you should see a breathing green light. Blue light indicates low water level, and red light is a sign to contact service.

Plants

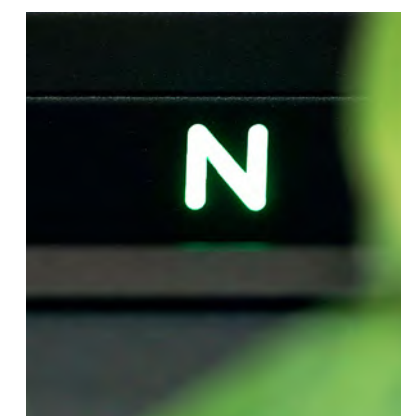

Naava's ever-green, soil-free, and allergy-friendly plants live in their own individual pots that are included in the product.

Water

Naava is not connected to the plumbing system, making it easy to install and relocate. All you need to do is fill the water tank weekly, and Naava's tech takes care of the daily watering. Naava's water is filled through a hole located either on top of the water tank or on the front wall.

Network

Naava's basic functions work offline, but Naava connects to the cloud with its own mobile connectivity for updates to its automation and AI taking care of the plants and Naava's performance.
